

ASTHA GUPTA

DevOps Engineer | AWS EKS | Kubernetes | Terraform | CI/CD | GitOps | Observability

+91-8278764302 guptaastha0311@gmail.com [LinkedIn](#) [My Portfolio](#) [GitHub](#)

PROFESSIONAL SUMMARY

DevOps Engineer with 3+ years of experience building and operating Kubernetes-based DevOps platforms on AWS at enterprise scale. Core expertise in Helm standardization across 40+ products, zero-downtime production releases, Terraform IaC, CI/CD automation. Reduced deployment inconsistencies by 60%, cut MTTR by 40%, and maintained 100% SLA compliance across 30+ production patch releases. Experienced in AWS (EKS, VPC, IAM, CloudWatch), RBAC-based multi-tenant cluster security, and full-stack observability with Prometheus and Grafana.

PROFESSIONAL EXPERIENCE

Dec 2024–Present DevOps Engineer | OpenText | Bengaluru, India

- Led **Helm chart standardization** across **40+ enterprise products** by developing reusable templates, centralized configurations and **CI/CD validation workflows**, reducing deployment inconsistencies by **60%**.
- Secured multi-environment Kubernetes workloads by managing **IAM policies**, **VPC network** segmentation, **Security Groups**, and **Load Balancers** across **EKS** clusters with **S3** backend state and **CloudWatch** monitoring.
- Improved resource utilization and application availability across 6 microservices by implementing Horizontal and Vertical Pod Autoscaling (**HPA/VPA**) on **AWS EKS**.
- Maintained **100% SLA** compliance across **50+ zero-downtime security patch releases** for **Kubernetes** microservices by implementing **rolling deployments** and **GitOps-aligned** release pipelines integrated into **Agile sprint cycles**.
- Reduced security vulnerabilities across patch releases by remediating container image findings from **Twistlock scan reports**, aligned with **DevSecOps** practices.
- Built and maintained **GitHub Actions CI/CD pipelines** covering build, scan, **Helm package** validation, and **Kubernetes deployment** across multiple environments.

Feb 2023–Dec 2024 Associate Software Engineer | OpenText | Bengaluru, India

- Cut **MTTR by 40%** by resolving production Kubernetes incidents (CrashLoopBackOff, image pull, ingress, resource limit failures) using **kubectl**, **CloudWatch Logs**, **Prometheus**, and **Grafana**.
- Reduced** average deployment time **by 30%** by containerizing microservices with **Docker** and orchestrating them on Kubernetes clusters.
- Cut infrastructure provisioning time by 50% by automating **AWS provisioning**, including networking, security groups, and **RDS-backed** environments, with **Terraform IaC** integrated into **CI/CD pipelines**.

Nov 2022–Feb 2023 Software Engineering Intern | OpenText | Bengaluru, India

- Validated **production readiness** across 20+ test cycles by deploying and testing **containerized microservices** on **Kubernetes** within **Agile sprint workflows**, identifying critical issues pre-release.
- Accelerated new engineer onboarding by 2 weeks by documenting deployment workflows in **Confluence** as reusable SOPs.

EDUCATION

B.Tech. Computer Science and Technology

SRM Institute of Science and Technology, Delhi • CGPA: 9.12/10.0

SKILLS

- Cloud:** AWS, EKS, EC2, VPC, IAM, S3, ALB / Load Balancers, CloudWatch, Security Groups, NACL, Subnets, Route Tables, DNS
- Containers & Orchestration:** Kubernetes, Docker, Helm, Docker Compose, HPA, VPA, Ingress, RBAC
- Infrastructure as Code & Automation:** Terraform, Ansible, S3 Backend, Remote State, Infrastructure Automation
- CI/CD & GitOps:** GitHub Actions, Jenkins, ArgoCD, GitOps, Git, GitHub, GitLab, Nexus
- Monitoring & Observability:** Prometheus, Grafana, CloudWatch, RED Method
- Security:** RBAC, Network Policies, Pod Security Standards, Secret Management, Twistlock, Vulnerability Scanning
- Scripting & OS:** Linux, Shell Scripting, Python, YAML, C++
- Tools:** Jira, VS Code, Confluence

PROJECTS

CI/CD Pipeline & Infrastructure Automation github.com/Astha224/CICD-IAC

- Provisioned AWS infrastructure (EC2, security groups, networking) using Terraform and built an end-to-end CI/CD pipeline with Jenkins, Nexus, Ansible, and Docker to automate build, test, artifact management, configuration, and deployment workflows.

AI-Powered Kubernetes Troubleshooting Assistant github.com/Astha224/AI-Kubernetes-Troubleshooter

- Built a FastAPI + React application integrated with Ollama for DevOps incident-analysis use cases, reducing manual log review effort by converting raw pod logs into structured RCA, severity, evidence, and remediation output. Containerized frontend/backend with Docker for local deployment and testing.
